CARRY

HARNESS

AIRSPPEED® SUSPENSION

AIRSPPEED® BACKPANEL

HIPBELT

AIRSPPEED SUSPENSION

- + Injection-molded ladder adjustment system provides 4" of torso adjustability
- + O/S per gender design delivers great fit and allows for quick, easy adjustment
- + Taller, wider 3.5 mm powder coated LightWire frame enhances fit range

AIRSPPEED BACKPANEL

- + 3D-tensioned breathable mesh backpanel ensures supportive fit
- + New design increases ventilated area up to 40% over our previous design
- + New yoke design ensures consistent fit at any setting

HARNESS

- + Highly ventilated die-cut EVA foam is wrapped in wide spacer mesh for outstanding comfort in all weather conditions
- + Adjustable sternum strap with rescue whistle

HIPBELT

- + Ventilated die-cut EVA foam is covered in wide spacer mesh for outstanding comfort in all weather conditions
- + Large zippered pockets provide secure access to small essentials on the trail
- + ErgoPull closure provides leverage to ensure snug fit and optimal load transfer

SIZING / FIT

STRATOS — MEN'S SIZING

O/S 18-22" / 46-56 cm

SIRRUS — WOMEN'S SIZING

O/S 15-19" / 38-48 cm

WOMEN'S SPECIFIC FIT

- + The unique suspended mesh located on the shoulders, backpanel, lumbar and hipbelt contour to a wide variety of body shapes and sizes to create a custom fit to your body.
- + The pack shape is narrower and deeper, allowing greater freedom of movement and increases stabilization by lowering the position of the load to a woman's center of gravity.
- + The shoulder harness is designed with different curves to create an anatomical fit for a woman's neck, shoulders and chest.
- + Women's hips are conically shaped with a larger difference between the waist and hip measurements. The hipbelts are shaped and angled to accommodate this difference, which allows a more comfortable load transfer and support.

FEATURES

ADJUSTABLE HARNESS

24L / 34L / 36L / 44L

1. Identify the harness plugs located in one of the four sizing loops on the backpanel.
2. Grab the plug's pull loop with thumb and forefinger and pull the harness's LightWire extension out and to the sides of the pack. This releases the harness and allows it to slide up and down.
3. Slide the harness up or down along the LightWire rails to the appropriate torso length.
4. There are two load-lifter ladder lock options. Correspond the lower two or upper two backpanel settings to the lower or upper load-lifter ladder lock.

INTEGRATED RAINCOVER

24L / 34L / 36L / 44L

The integrated, removable raincover provides protection in adverse weather conditions.

1. Locate the raincover icon near the base of the pack and unzip the raincover compartment.
2. Pull the raincover from the compartment and place over the top and bottom of pack using the peripheral elastic to hold it in place.
3. Reverse this process to return raincover to compartment.
4. To remove the raincover altogether, unfasten the toggle from the cord loop and remove.

Note: To prevent mildew allow the raincover to dry entirely before storing.

INTERNAL RESERVOIR SLEEVE

24L / 34L / 36L / 44L

Place reservoir inside sleeve to help ensure proper pack weight distribution. Clip reservoir to buckled loop to keep upright.

SLEEPING BAG COMPARTMENT

34L / 36L / 44L

Lower zippered compartment for dedicated sleeping bag storage. The bellowed divider allows full utilization of the pack's volume when sleeping bags aren't carried.

FEATURES

REMOVABLE ACCESSORY STRAPS

34L / 36L / 44L

Removable accessory straps for external attachment.

1. Unclip the two accessory strap buckles.
2. Remove the webbing from the triglide at the base of the pack.
3. Reverse to reattach.

STOW-ON-THE-GO TREKKING POLE ATTACHMENT

24L / 34L / 36L / 44L

Osprey's Stow-on-the-Go trekking pole attachment is designed to quickly attach and carry trekking poles while wearing a pack.

1. Locate the elasticized loop on the lower left side of pack. While pulling the loop out from the pack, insert the basket end of the trekking poles into the loop.
2. On the left harness strap locate the trekking pole icon. Pull up on the cord to open, place pole handles in the loop and tighten with the cord lock to secure.
3. Reverse these steps to remove the trekking poles.

UPPER SIDE COMPRESSION STRAPS

24L / 34L / 36L / 44L

Side compression straps with quick release buckles compress and stabilize loads for optimal carry and can be used to secure items to side of pack.
